Technical Skill

- Frontend Development: RectJS, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS
- Frameworks & Libraries: Redux, REST API's
- Backend Development: Node JS, Express, MongoDB
- Development Tools: Git, Postman, Lighthouse

Projects

E-Commerce Website | MERN + Redis + Docker   GITHUB LINK July 2025
- Developed a full-stack e-commerce website using the MERN stack with Docker and Redis for optimized performance, reducing API response time by 30%.
- Implemented product search and advanced filtering features to enhance user experience.
- Integrated Razorpay for secure and seamless online payment processing.
- Containerized the application for scalable deployment and efficient development workflow.

A crypto tracking app with integrated AI chatbot | React, Tailwind CSS, Express, MongoDB   GITHUB LINK March 2025
- Developed a web app where users can search real-time cryptocurrency prices (e.g., Bitcoin, Ethereum)
- Integrated Google Gemini AI API to create a chatbot that answers crypto-related questions from users
- Implemented MongoDB to store user data

Expense Tracker|| MERN Stack, Tailwind CSS   GITHUB LINK Feb 2025
- Developed a full-stack expense tracker allowing users to add, update, delete, and view expenses (CRUD operations)
- Implemented category-based filtering and options to mark expenses as done, undone, or view all
- Used MongoDB for user authentication to restrict access to personal expense data
- Developed the frontend with React and managed API endpoints with Node.js and Express

l Education

Government College (Autonomous), Sambalpur University   Bhawanipatna, Odisha

Bachelor of Computer Applications (BCA)   *Aug. 2019 – Jul 2022*

Courses and Certificates

Mern Stack Courses   Certificate
Hackathon   Certificate
